blended margin per paid
shot, base case

\$0.9-1.3M

12-month MVP, SA-led
team of 9

THE OPPORTUNITY

Simulator golf is the fastest-growing corner of the game: a **\$2B+ equipment market** growing about 9% a year, with play spend on top. Paid shots on sims are already proven, and **Full Swing's Skill Strike paid out \$400K in its first month**. But it pays small multiples, and only on Full Swing hardware. Nobody owns **one swing at a famous hole for life-changing money, on any simulator**.

THE PRODUCT

- **The Collection:** 8-12 par-3s inspired by famous holes, rotating and sponsor-named. They run in a light Unity app that plugs into any launch monitor.
- **Free play everywhere:** leaderboards and closest-to-the-pin. Free play also collects the ace-rate data insurers price on.
- **Paid, insured shots:** our server decides every result on our own physics, with cameras, a witness and ID checks. It uses the Get Lucky app's existing claims engine.

HOW IT MAKES MONEY

TIER	ENTRY	PRIZE	TEE
Starter	\$5	\$2,500	150-165 yds
Classic	\$10	\$5,000	160-175 yds
Pro	\$25	\$15,000	170-185 yds
Major	\$50	\$35,000	180-195 yds
Legend	\$100	\$100,000	195-210 yds

On each paid shot the insurer takes about 2x the expected loss, the venue 20%, and fees and ID checks about 5%.

About 45% is left for Get Lucky, assuming 1 ace per 8,000 shots. Venue licences, sponsor-named holes and corporate shoot-outs add to that. **Base case: 2,500 bays by year 3, about \$16M revenue and \$8M contribution**, from fewer than 3 paid shots per bay per day.

WHY GET LUCKY WINS

- **A live, insured product.** Up to R1m prizes backed by Santam and Indwe, with the claims, evidence and risk engine already built.
- **A channel.** The simulator strategy has 270+ gym bays in play with Virgin Active and Planet Fitness, plus Golfzon.
- **A brand made for the moment.** *Back yourself on any par-3.*

TOP RISKS AND HOW WE HANDLE THEM

- **Fake shots.** Simulator data can be spoofed. The server decides every result, and paid play starts at certified venues with cameras and a witness.
- **Aces happen more often than priced.** Simulators run about 1 in 7,000 shots. Prizes scale with distance, attempts are capped, and our own data sets the price.
- **Treated as gambling.** Paid play only where a legal opinion says it's a skill contest: SA and about 38 US states. Everywhere else is free.
- **Closed platforms.** TrackMan, Golfzon and Foresight need partner deals; open monitors work day one.
- **Payments.** Stripe restricts skill games. Use PayFast (SA) and Paysafe or Nuvei (US).

WHAT IT TAKES

- **Team and cost:** 9 people for 12 months, **\$0.9-1.3M** all-in, including legal opinions and insurance set-up.
- **Timeline:** legal, insurance and partners in months 0-3. Free play live by month 7, paid shots in SA by month 10, US venues by month 12.

NEXT 90 DAYS

1. **Santam/Indwe term sheet** for simulator aces, plus a Lloyd's broker for USD cover.
2. **SA and US legal opinions.**
3. **TrackMan, Uneekor and Golfzon** talks on signed shot data.
4. Greybox three holes; start logging free-play aces.
