

GET LUCKY GOLF · MASTER STRATEGY 2026-2030

THE FULL PLAN

Back yourself on any par-3: on the course, in the gym, on any simulator, anywhere. Three engines, one insurance book, one brand, launched at Fancourt.

ONE PLAN, THREE ENGINES

THE PLAN ON ONE PAGE

The mission. Get Lucky turns the hole-in-one into a product: one insured swing, a life-changing prize, paid on the spot. It sells on every par-3 a golfer stands on, whether that is a real course, a gym bay or any simulator, anywhere in the world.

Three engines, each with its own route to market:

1. **The app on real courses.** The Get Lucky app sells insured swings on every par-3 in the country: 95 courses and 385 par-3s are loaded today. South Africa comes first, then the US and Europe, with no physical build per course.
2. **The bays.** Virgin Golf and Planet Golf: 272 Golfzon bays in South Africa's two biggest gym chains. They are financed by RMB and run by Get Lucky. That is a property-style cash-flow business with the insured shot on every bay.
3. **The simulator software.** "Get Lucky mode" inside Golfzon's software, proven on the gym bays and then rolled out to Golfzon's ~13,000 locations. A Get Lucky app for other simulator brands follows.

One insurance book sits under all three: Santam through Indwe in South Africa, one-off cover for the R10m Icons prize, and global cover for the US and Europe.

One brand and one launch. Get Lucky is the master brand. The public launch is Icons Cup South Africa at Fancourt, 11-13 December 2026, with a R10m hole-in-one on the Get Lucky hole. Ernie Els signs there as founding partner.

R600M

app entry revenue
over 36 months
(insurance model,
base case)

R261M

bay revenue a year at
maturity, R151m
EBITDA (VA + PF,
2031)

\$16M

simulator software
revenue in 2029
(Golfzon base case)

R144M

premium to Santam
over 36 months from
the app

11 DEC

the launch: Icons Cup,
The Links at Fancourt

The rule that holds it together The plan must work **without** the amplifiers (Ernie, Icons, Virgin Active), just more slowly. It **cannot** work without the three load-bearing pieces: Santam cover, RMB finance and a simulator platform. Each load-bearing piece gets a fallback. Each amplifier gets pursued hard, but never promised early.

WHERE WE STAND TODAY

PIECE	STATUS (23 SEP 2026)	WHAT MAKES IT REAL
The app	Built end to end: 95 courses, 385 par-3s, PayFast wired and tested, the full claim path with sealed evidence. Not public yet	The SA cover signed
On-course network	30 partner courses with 18,000 members. 10,000 paid entries across 800 activations in 12 months. 600 golf days a year. PGA Show demand proven	Scale through the app
Insurance: SA book	Santam carries the risk and Indwe places it. Mobile challenge cover not yet signed . Signing date requested 22 Sep	Signature
Insurance: Icons R10m	Quote requested from Specialist Solutions on 22 Sep	Bound cover, with a back-up market
Icons Cup	Full proposal sent 22 Sep; waiting on a yes in principle. App beta live at /icons	Signed partner agreement
Ernie Els	Being finalised. Target: signing at Fancourt	Signature
Golfzon	First meeting Fri 25 Sep with Sean Pyun	Pricing, then a software MoU
Planet Fitness	Meeting Fri 2 Oct with Mannee de Wet	LOI for phase 1
Virgin Active	Marketing says "not the focus now". Product route open (Nosarka / Wiener)	Product-team meeting
RMB	Structure modelled: 90% debt, prime + 1.5%, 12 months interest-only, then 60 months amortising	Indicative term sheet
Simulator software	Research, feasibility and architecture done (this repo)	Golfzon terms, then the build

ENGINE 1: THE APP ON REAL COURSES

What it is. One swing at one par-3, bought in the app before you tee off, with the prize insured by Santam. There are no subscriptions and no unlimited swings. The claim is verified with sealed video, GPS, timestamps, witnesses and club confirmation.

The economics (Get Lucky Insurance Model, 36 months):

- **Ladder:** \$1→\$500, \$5→\$2,500, \$10→\$10,000, \$50→\$50,000 and \$100→\$100,000. The blended entry is \$17.
- **Premium:** 24% of every entry for 100% cover. Loss ratio 31.9%; break-even at 2.5× amateur ace odds.
- **Volume:** 1.9m insured swings. Entry revenue of \$1.6M in year 1, \$9.0M in year 2 and \$21.8M in year 3, **\$32.4M (about R600m) in total**.
- **What Get Lucky keeps:** 76% of each entry before payments, marketing and operations.

How it grows:

- **SA:** the 30-course network and the Top 100 courses. The October "Back an Icon" campaign drives registrations before December.
- **US and Europe:** 42M golfers on about 23,000 courses. The app goes to market with no build per course. Paid play opens only where legal opinions allow: the US dominant-factor states first, then the UK after counsel's opinion.
- **The growth assumption to watch:** the model's year-2 and year-3 volumes lean on a **200,000-player "Ernie Partner Network"** (PGA, Golf Breaks, YGT, 100 partner courses) and on **global markets opening in year 3**. Those volumes depend on Ernie signing and on those partnerships.

ENGINE 2: THE BAYS (VIRGIN GOLF AND PLANET GOLF)

What it is. Get Lucky buys, installs and runs Golfzon bays inside gym clubs under 10-year concessions:

- The gym gives the room and the members, and takes 20% of every rand.
- RMB finances 90% of capex, and Get Lucky puts in 10% equity.
- Revenue comes from bay hire booked like padel, a R299 a month golf add-on, leagues, a naming sponsor and the insured shot.

BASE CASE	VIRGIN ACTIVE	PLANET FITNESS	TOGETHER
Bays / clubs	200 / 130	72 / 42	272 / 172
Landed capex	R179.9m	R70.8m	R250.7m
Get Lucky equity (10%)	R18.0m	R7.1m	R25.1m
Revenue, 2031	R191.2m	R70.1m	R261.3m
EBITDA, 2031	R111.6m	R39.8m	R151.4m
Paid to the gym, 2031	R37.2m	R13.7m	R50.9m
DSCR, 2029 / 2031	2.00 / 2.58	1.93 / 2.34	
Cumulative cash low point	-R8.8m (2027)	-R4.5m (2027)	-R13.3m

Its job in the plan:

- It is cash flow.
- It is the proof site for Engine 3: about 96 paid shots per bay per month at maturity.
- It is the credential that earns Golfzon's attention.

Order of play: Planet Fitness signs first, and Virgin Active follows with Planet Fitness in hand.

ENGINE 3: THE SIMULATOR SOFTWARE (GOLFZON)

What it is.

- Golfzon builds "Get Lucky mode" into its commercial software. The Collection of famous-inspired par-3s is played with the tee locked to the prize tier's distance.
- Golfzon sends signed shot events to Get Lucky.

- Get Lucky runs the wallet, identity checks, insurance, claims and payouts. That is the same back end as the app.

Stages:

- The gym bays from 2027.
- Golfzon's US venues in 2028.
- Golfzon's global network from 2029: paid play where legal, free play with sponsor prizes elsewhere.
- Get Lucky's own lightweight app for TrackMan and Uneekor venues after that, which is also the fallback.

Economics (base case, 2029):

- 2,500 connected bays, 80 paid shots per bay per month.
- **About \$16.4M revenue and \$5.8M contribution** after a 15% Golfzon share, which is still to be negotiated.
- First-year build \$0.8–1.2M.

Full detail is in the research report.

 HOW THE ENGINES FEED EACH OTHER

FROM → TO	WHAT FLOWS
App → bays and simulators	One account, one wallet, one claims engine. The bays and Golfzon plug into the app's back end, so nothing gets built twice
Bays → simulator software	Live proof: real ace rates, fraud controls, the insurer's loss ratio, and a Golfzon reference other operators can visit
Simulator software → app	Golfzon's 6M+ members and 100M+ rounds a year become Get Lucky players, and they then play the app on real courses
Icons → all three	The broadcast moment, registered fans, Ernie, and Santam's name on the prize
Insurance book → all three	One relationship and one data set. Every surface makes the book bigger and the pricing better

ONE INSURANCE BOOK

LAYER	CARRIER	STATUS	NEXT STEP
SA foundation: app on courses	Santam, placed by Indwe	Agreed in principle 2 Sep; not signed	A signing date. It opens the app
Icons R10m	Santam Specialist Solutions, one-off facility	Quote requested 22 Sep	Quote within two weeks, plus a parallel back-up quote from the contingency market (SCA Promotions, Lloyd's)
Simulator shots (bays, Golfzon)	Santam first; Lloyd's or a contingency carrier for USD	Not started	Price on Golfzon's ace data and the gym bays' own record
US and Europe (app and simulators)	Santam's appetite abroad, or a Lloyd's programme via a broker	Not started	Broker process in 2027, after the SA book shows a loss ratio

Two ladders, one book. Real courses and simulators have different odds, so they need different prize ladders:

- **Real courses (app):** amateur odds are about 1 in 12,500, so the ladder can pay 500–1,000×. Example: \$10 wins \$10,000.
- **Simulators:** aces come about 1.8× more often, around 1 in 7,000 on Golfzon, so the ladder is leaner and prizes scale with tee distance. Example: \$10 wins \$5,000. The \$100K tier is gated.

Santam should hear this from us first. It shows we price each surface on its own odds.

ONE BRAND, ONE LAUNCH

Brand architecture:

- **Get Lucky** is the master brand and the app.
- **Virgin Golf** and **Planet Golf** are co-branded bays inside the gyms (their marks remain theirs).
- **Get Lucky mode** is the product inside Golfzon.
- **The Ernie Els Hole in One Challenge** is the founding-partner endorsement, once he has signed.

The launch sequence:

1. **October: announcement.** Official Hole-in-One Partner of Icons Cup South Africa. The app opens to the public once the SA cover is signed, and "Back an Icon" starts (fans register and back an Icon).
2. **October-November: campaign.** Fans back themselves on their local par-3 while backing an Icon. Planet Fitness members get a free swing. Registrations feed the broadcast and ticketing.
3. **11-13 December: Fancourt.** The R10 Million Swing on the broadcast to 150+ countries. **Ernie signs as founding partner.** Then the global announcement: the app, Get Lucky mode on Golfzon, and Virgin Golf and Planet Golf bays in 2027.
4. **January 2027: PGA Show, Orlando.** Golfzon America and the US launch conversation.

THE PHASES TO 2030

PHASE	WHEN	GOAL	MILESTONES	SCORECARD
0. Close	Sep–Dec 2026	Every partner at least conditionally signed, then public launch	Golfzon pricing (25 Sep) · PF LOI (Oct) · SA cover signed · R10m bound · Icons agreement · RMB term sheet · Ernie signed at Fancourt	Signed documents; registered players by 11 Dec; Icons votes
1. Prove	2027	Every engine live in SA	Firm Golfzon order and RMB approval (Jan–Feb) · first 60 bays live mid-year · Get Lucky mode live on those bays · app at scale in SA · first loss-ratio review with Santam	Paid entries a month; aces vs. priced odds; bay utilisation vs. model (Signature 40%); DSCR
2. Scale SA, enter the US	2028	200 bays; the US opens	VA phase 2 (100 Play bays) · PF phase 2 · US legal opinion · US insurance programme · app paid play in US dominant-factor states · Get Lucky mode at Golfzon US venues	US paid players; Golfzon bays connected; blended margin after insurer and Golfzon shares
3. Global	2029–2030	Golfzon's network and Europe	272 gym bays live · Golfzon rolls Get Lucky mode out to its operators · UK after counsel's opinion · Virgin Active's international clubs · adjudicator for other simulator brands	Bays connected (base 2,500 by 2029); countries live; share of revenue outside SA

The **Deal Sequence** document is the week-by-week playbook for phase 0.

CAPITAL PLAN

What needs funding:

- **Bays:** R25.1m of equity (10%), plus the 2027 cash low point in the model (–R13.3m across both chains). RMB funds the other 90% of capex.
- **Simulator software:** \$0.8–1.2M (about R15–22m) in the first year.
- **App launch:** marketing for the October–December campaign, legal opinions (SA first, about \$70–170K for SA plus the US), and insurance set-up.
- **Icons:** the rig, the tracer and camera verification. The prize itself is insured, and the premium is offset by the rights package Santam buys into.

How to fund it, in order:

1. **Now to December: bridge on the current balance sheet and partner money.** Offset the Icons premium with the Santam brand-side rights package. Get sponsor revenue from named holes.
2. **After Fancourt: raise once, at the new valuation.** With Santam cover, Golfzon, a signed gym chain, RMB and Ernie all real, the equity story is worth more in January than in October. Consider offering Ernie equity or a founding-partner share instead of cash. Size the raise to cover bay equity, the simulator build and 18 months of US entry.
3. **Debt for the bays.** RMB, with Golfzon vendor or lease finance and a second bank as alternatives.

ORGANISATION

WHO	OWNS
Johannes Le Roux	The deals: Golfzon, RMB, Santam and Indwe, Icons, Ernie. Strategy and fundraising
Andrew Davenport	Brand, marketing and partnerships: the Icons campaign, the gym launches, the course network
Hire: bays operations lead (Q1 2027)	Installs, bookings, leagues, gym relationships
Hire: platform team (from Q4 2026, 8 people)	The app back end, the Golfzon integration, claims and verification
Hire: insurance and compliance manager (Q1 2027)	Loss-ratio reporting, claims files, legal opinions, responsible play
Hire: US partnerships lead (2028)	US courses, Golfzon US venues, US insurance programme

Run a **weekly deal board** until Fancourt, with one line per party: status, next step, date, owner. After Fancourt, move to a **monthly scorecard** based on the phase table.

LOAD-BEARING AND AMPLIFIERS

	PIECE	IF IT FALLS AWAY
Load-bearing	Santam SA cover	The app can't open. Back-up: Indwe places with another carrier. Push for the signing date now
Load-bearing	RMB finance	The bays can't be built. Back-up: Golfzon vendor or lease finance, or a second bank
Load-bearing	A simulator platform (Golfzon)	The bays still run Golfzon for bay hire. Get Lucky's own app runs on TrackMan or Uneekor
Amplifier	Ernie Els	The app, bays and software all stand. The US and Europe open more slowly, and the partner-network volumes in the model come down
Amplifier	Icons Cup	Launch at another event. The R10m prize is not needed for the business
Amplifier	Virgin Active	Planet Fitness is the reference; RMB and Golfzon run on 72 bays. Virgin Active comes later

BEFORE ANYTHING ELSE GOES OUT

Four places where our own materials disagree with each other or with the facts. Fix them before the next document goes to anyone, because Santam, RMB and Icons sign on what they read.

- Ernie's status.** The Indwe pre-read says he is "now officially backing" the challenge, and the workbook is titled "Ernie Els backed". He signs at Fancourt. Until then, use one line everywhere: "founding partner, being finalised".

2. **The "SA base case".** The emails call R144m premium and R28.8m brokerage the "SA base case alone". The workbook behind it opens UK, US, Middle East and Asia markets in year 3, and adds a 200,000-player Ernie Partner Network. Either relabel it as the global base case, or show an SA-only version next to it.
3. **The Icons prize.** Icons was told in August the R10m was "secured... fully underwritten". Bind it, with a back-up quote, before the Icons agreement is signed.
4. **Two ladders.** The app ladder (\$10→\$10,000) and the simulator ladder (\$10→\$5,000) differ on purpose. Explain why before Santam spots it.

DECISIONS FOR JOHANNES

1. **Planet Fitness first?** Should the gym programme lead with Planet Fitness (72 bays), treating Virgin Active as upside rather than a condition for RMB and Golfzon?
2. **When to raise.** Bridge to Fancourt and raise once in January, or raise a small round now?
3. **Ernie's deal.** Cash, equity or a revenue share? A founding-partner share lines him up with the global upside and preserves cash.
4. **Golfzon's price.** How much revenue share and exclusivity are we willing to give for Get Lucky mode, and in which markets?
5. **The model labels.** Relabel the insurance workbook as "global base case", or build an SA-only version for Santam?
