

HOLE-IN-ONE SIMULATOR SOFTWARE

The world's best par-3s inside Golfzon, then on every simulator.
Play free, or back yourself with one insured swing to win up to
\$100,000.

VERDICT: GO, WITH GOLFZON

Use the 272-bay gym programme to put Get Lucky mode inside Golfzon, then take it to Golfzon's 13,000 locations.

272

Golfzon bays proposed:
Virgin Active + Planet Fitness, 2027-29

~13,000

Golfzon locations in 40+ countries, 100M+ rounds a year

~96

paid shots per bay per month at maturity (gym bay model)

\$100K

top prize, insured, gated
Legend tier

\$0.8-1.2M

first-year build, SA-led team of 8

THE OPPORTUNITY

Simulator golf is the fastest-growing corner of the game: a **\$2B+ equipment market** with play spend on top, and 9M+ US players. **Full Swing's Skill Strike paid out \$400K in its first month**, so paid shots on sims are proven. But it pays small multiples on one brand of hardware. Nobody owns **one swing at a famous hole for life-changing money.**

THE BASE CASE: GOLFZON

- **The bays are the way in.** Get Lucky is proposing 272 Golfzon bays for 172 gym clubs, RMB-financed, about \$11M of hardware at list. The software goes into the same negotiation.
- **Golfzon builds "Get Lucky mode"** in its software and sends signed shot events. Get Lucky runs the wallet, identity checks, insurance, claims and payouts.
- **Golfzon covers the hard parts:** locked bays, member log-in, NASMO swing video, and data on 143,020 aces logged in 2022 for the insurer.
- **Three stages:** SA gym bays from 2027, Golfzon US venues in 2028, the global network from 2029. Paid play where it's legal; free play and sponsor prizes elsewhere.

WHAT IT TAKES

- **Team and cost:** 8 people, **\$0.8-1.2M** in year one, including legal opinions and insurance set-up.
- **Timeline:** Golfzon deal in Q4 2026, build in H1 2027, live on the first 60 gym bays mid-2027.

HOW IT MAKES MONEY

TIER	ENTRY	PRIZE	TEE
Starter	\$5	\$2,500	150-165 yds
Classic	\$10	\$5,000	160-175 yds
Pro	\$25	\$15,000	170-185 yds
Major	\$50	\$35,000	180-195 yds
Legend	\$100	\$100,000	195-210 yds

On each paid shot the insurer takes about 2x the expected loss, the venue 20%, Golfzon about 15% (to negotiate) and fees about 5%. **About 30% is left for Get Lucky**, assuming 1 ace per 8,000 shots. **Base case: 2,500 bays by 2029, about \$16M revenue and \$6M contribution.**

TOP RISKS AND HOW WE HANDLE THEM

- **Golfzon says no.** It's negotiated inside the hardware order. The fallback is our own app on TrackMan or Uneekor.
- **Fake shots.** Signed Golfzon events, swing video, ID checks and a witness on big prizes.
- **Aces happen more often than priced.** Prizes scale with distance, attempts are capped, and Golfzon's data sets the price.
- **Treated as gambling.** Paid play only where a legal opinion says it's a skill contest: SA and about 38 US states. Korea and Japan get free play.
- **Payments.** PayFast (SA); Paysafe or Nuvei (US).

NEXT 90 DAYS

1. **Golfzon (Fri 25 Sep):** pricing, reference design, then a term sheet for Get Lucky mode, signed events, ace data and revenue share, alongside the hardware.
2. **Santam/Indwe term sheet** for simulator aces.
3. **SA legal opinion**, then US.
4. Golfzon integration spec and API contract.
